- Back-end with Nodejs

LANGUAGES

English (C1)
Korea (Basic)
Burmese (native)

PROFILE

I am a highly motivated and results-driven professional with a passion for technology. I am eager to contribute my skills and expertise to a dynamic and forward-thinking organization. With a strong foundation in coding and problem-solving, I am committed to making impactful contributions that drive innovation and foster growth.

Let's connect and explore how my experience and passion can contribute to the success of your organization.

WORK EXPERIENCE

Translator - BLCN

2020 - 2022

In my role as a translator, I specialized in translating movies and series from English to Myanmar, ensuring accurate and culturally relevant content.

Sales Assistant - Nayz Thit Store

2021 - present

I am working at my parents' store where we sell things like stationaries, daily use items, and snacks. I engage with a diverse range of customers from 9 am to 1 pm. This includes communicating with old women, toddlers from the neighborhood, students, teachers, and teenagers. I learned to adjust my communication style based on the customer's age and preferences, ensuring they felt comfortable and understood. Alongside maintaining a tidy store and assisting with tasks like cash handling and restocking, this experience strengthened my ability to connect with people from various backgrounds.

Volunteer

VarCamp 2.0

- Worked collaboratively with other volunteers and event organizers to ensure the success of each project.
- Developed problem-solving skills and learned how to approach challenges like a professional.

Projects

Restaurant POS System

Technology
- Angular, Typescript, Nodejs, Sequelize

Currently implementing a Restaurant Point of Sale (POS) system, catering to diverse user roles such as wait staff, manager, and supervisor. Designed and developed functionalities for menu selection, menu configuration, reservation management, and the generation of kitchen orders and bills.

UNOPay

Technology
- Angular, Bootstrap, Typescrpt,

A project focused on facilitating group transactions and virtual money transfers. The features include user creation of groups, addition and removal of members, as well as the ability to transfer virtual currency within the group. The project also aims to incorporate a system for tracking owed and received amounts among group members, particularly in the context of game winnings.
